

An Ingersoll Rand Business

TWO-STAGE OIL LUBRICATED ROTARY VANE

VCD Series

Ingersoll Rand

Ingersoll Rand Inc. (NYSE:IR), driven by an entrepreneurial spirit and ownership mindset, is dedicated to Making Life Better for our employees, customers, shareholders, and planet. Customers lean on us for exceptional performance and durability in mission-critical flow creation and industrial solutions. Supported by over 80+ respected brands, our products and services excel in very complex and harsh conditions. Our employees develop customers for life through their daily commitment to expertise, productivity, and efficiency. For more information, visit www.IRCO.com.

Ingersoll Rand's brands include Ingersoll Rand, Gardner Denver, Elmo Rietschle, Robuschi and dozens of other well-known enterprises in the field of air compressors, blowers and vacuum pumps.

1950s / 60s Continued to expand the North American market through several acquisitions, including CycloBlower and Keller Tools

Early 2000s Gardner Denver has established itself as a global supplier of compressed air and vacuum technologies

2013 KKR & Co., an American multinational private equity firm, acquired

Simon Ingersoll invented the steam driven rock excavator 1872

Albert Rand founded Rand&Waring Excavator and Compressor Company

1960 - 2000 Gradually acquired many important businesses, including: Von Duprin Von Duperin, Torrington, Sillage Lock, Newman Tonks, Cold King & Hasman

2007 - 2018 IR sold road development, lynx, small equipment and other businesses, and completed the acquisition of Trane on June 5, 2008; Acquired CAMERON centrifuge in 2015

March 1st 2020 Formally completed its merger with Ingersoll Rand Industrial Group

Elmo Rietschle

Elmo was granted the imperial patent for the world's first liquid ring vacuum pump: just three years later a smaller Elmo vacuum pump was used in Germany's first vacuum cleaner

The first side channel blower was introduced in 1963 and greatly revolutionized the vacuum and pressure market. Elmo had always been focusing on professionalism and dedication, as it designed and manufactured the highest-quality machine and provide engineering support

In 2006.Gardner Denver acquired Elmo and Rietschle to launch the Elmo Rietschle brand name

o 1903

Siemens. Elmo joined Nash Inc. to form Nash Elmo

After splitting from

Formally completed merger with Ingersoll Rand Industrial Group

o 2006

o 2020

Werner Rietschle launched Werie which quickly

became a leading supplier of small vacuum pumps and compressors, known afar for its dedicated customer service, flexibility, and innovation

Rietschle was acquired by Thomas Inc. to form Rietschle Thomas. Thanks to its numerous facilities and large sales network across the world. Rietschle provided its customers with strong technical and service support

2002

Industry Application

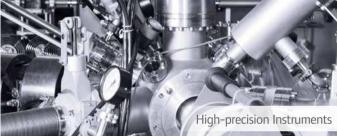

The two-stage oil lubricated rotary vane vacuum pump is a device widely used in scientific research, industry, and medical fields, mainly for generating high vacuum environments to meet various testing and production needs.

It can be used as an independent vacuum pump and can also be used in conjunction with booster pumps, diffusion pumps, and molecular pumps.

Typical Application

- Scientific research laboratory: used for experiments that require precise control of the vacuum environment, such as chemical reactions, material testing, etc
- Industrial production: vacuum coating, vacuum drying, vacuum impregnation, etc
- Medical equipment: glove box, nuclear magnetic resonance equipment, etc
- Environmental engineering: gas purification and recovery system
- Food packaging: vacuum packaging process
- Other fields: semiconductor manufacturing, lighting equipment production, aerospace, etc

VCD Series Two-stage Oil Lubricated Rotary Vane

Modern vacuum engineering applications place increasingly stringent demands on the vacuum pumps and components used. Elmo Rietschle meets these increasing demands with vacuum solutions, components and complete systems. As a brand with many years of experience in the development and manufacture of oil-filled rotary vane vacuum pumps, Elmo Rietschle is known for innovative products with excellent design, outstanding reliability and environmental compatibility. VCD series two-stage oil lubricated rotary vane vacuum pump has been newly developed by Elmo Rietschle, which is designed for a wide range of vacuum applications.

Feature Overview

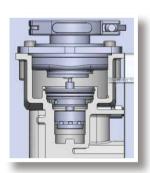

- Reliable quality and stable operation
- Forced lubrication, excellent performance
- Multi-stage air ballast, adjustable as needed
- Tight sealing to prevent oil return
- Low noise and vibration, safe to use
- Simple structure and easy maintenance

Three-position Adjustable Ballast Valve

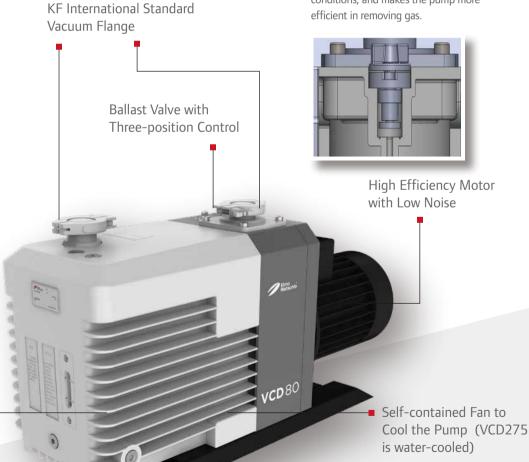

Unlike the two-position adjustment commonly found in the market, VCD series adopts three-position adjustment, which allows users to better adjust the compression ratio of the compression chamber according to different working conditions, and makes the pump more efficient in removing gas.

High Reliability One-way Valve

It has the characteristics of high strength and good toughness, and the valve can be opened and closed flexibly and sealed reliably, which can effectively prevent the oil return phenomenon during the suction process of the pump

Enhanced Heat Dissipation Rear Wing

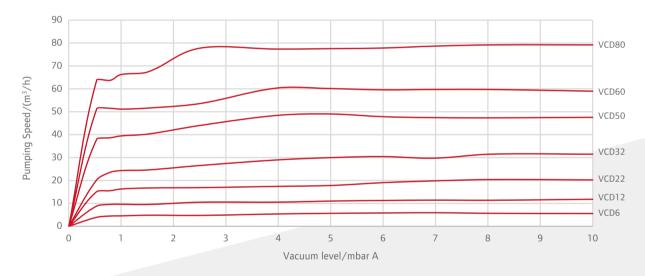

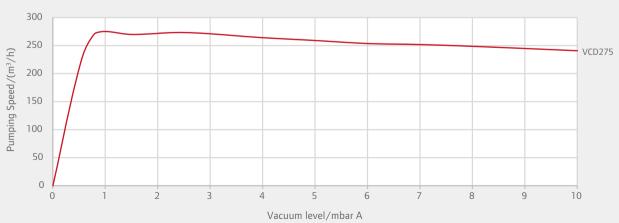

Technical Parameters

| Model | VCD6 | VCD12 | VCD22 | VCD32 | VCD50 | VCD60 | VCD80 | VCD275 | |

OIL LUBRICATED

VACUUM

VCD with...

Booster

Paired with the Ingersoll-Rand booster pump, the VCD has a higher pumping speed and a higher ultimate vacuum capability.

Oil Lubricated Rotary Vane + Booster

Using a single-stage rotary vane pump + booster pump combination as the front pump, VCD can be used as a vacuum maintenance pump to operate in a more energy-efficient and efficient mode.

After-sales Service

We Keep An Eye on every machine in use

We Pay Great Attention to the user experience of every customer

We Care About the customers return on investment of every plant

Ingersoll Rand provides comprehensive after-sales services, including but not limited to preventative & scheduled maintenance program, genuine parts, onsite inspection, expert maintenance, customer visits and effective professional training, just to make sure that every product runs well at optimal performance for your peace of mind.
